

JP Logistics Solutions offer shipping for all kinds of personal effects and products from the UK and EU to the Caribbean and USA.

In order for them to transit through our logistics hub efficiently, and to be readily identifiable during the shipping process we suggest that all items are labelled as per the instructions below.

Example Label

Labelling Requirements:

- Important - With barrels, labels can fall off so write directly onto the barrel.
- For non-barrel consignments, attach your labels to at least 2 sides of each item being shipped.
 - Note: JPLS can supply labels if our driver is collecting the cargo from you, or you are dropping the goods into our Rainham logistics hub.
- Ensure the labels include JPLS reference number and consignee telephone number.
- Ensure the cargo is marked as 1 of 2, 2 of 2, etc.
- Please ensure all labelling is legible and ideally in capital letters.
